### **Brief description of WatchMeGrow® and what it is**

Your Center provides as a service the WatchMeGrow® system, which permits a parent or family member with internet access (using a web browser like Netscape or Microsoft Internet Explorer) to view images of their child’s room. In addition to images, WatchMeGrow® may provide on-line schedules, message boards and other features designed to enhance the communication between yourself, your child, and your center. At last, you can ask your child about specific events in their day, as opposed to the question, “what did you do today?” More detailed information on the service is available from your Director.

### **Acknowledgement of operation of WatchMeGrow®**

I acknowledge that the Center has entered into an agreement with WatchMeGrow® to provide parents with Internet access to images of their children while at the Center, and that my child’s room is included in this agreement.
